

Quick Ways To

Maintain your Mahindra

Take Care of It Like A Pro!

Tractor

Know your Levels

- Check your fluid levels **regularly**.
- Change your oil at least **once a year**, if not meeting the hourly requirement.
- Got leaks? Refer to your **Operator's Manual*** and **contact your dealer**.

Check your Filters

- Check your filters **regularly**.
- Check your **fuel filter for built - up water**.
- Clean your air filters **weekly** to prevent clogged filters in dusty conditions.

Grease your Tractor

- Grease your tractor **periodically**.
- Use **recommended grade of grease** for your tractor.
- **See your dealer** to purchase **Mahindra Lubricants** for best results!

UTV

Know your Levels

- Check your fluid levels **regularly**.
- Change your oil at least **once a year**, if not meeting the mileage or hourly requirement.
- **Drain and replace** coolant with premixed 50% antifreeze and 50% distilled water **every 2 years**.

Check your Engine

- **Pay attention** to the Check Engine light.
- The light acts as a **warning for potential issues** in the future.
- If your Check Engine light comes on, make sure to **see your dealer**.

Check your Tires

- **Always** replace tires when tread depth is **3 mm or less**.
- Tires are important for the suspension of the UTV.
- Only replace with **approved tires** of the **same type and height** on all axles. Check your **Owner's Manual*** for more information.

Mahindra Quick Tips:

Keep your Tractor and/or UTV clean!
This helps to prevent overheating and identify any hidden maintenance issues.

Schedule routine maintenance checks!
This will help ensure your machine gets the specific maintenance it requires.

* Please check your Operator's/ Owner's Manual for actual values.
